Price \$3.00

FOREWORD

The availability of adequate voting statistics is fundamental to the study of many aspects of the government or politics of a state. Unfortunately, in most states, including Illinois, no central compilation of election returns has been made, and, as a result, political research has been made extremely difficult or even impossible.

Illinois Votes has been published to provide basic research data on a county-by-county basis to aid and encourage further studies of Illinois voting behavior. Although this volume has been designed primarily to aid scholars, it should be of interest also to Illinois public officials, political party leaders, and citizens interested in learning more about voting trends and behavior.

The Institute wishes to thank all those who have helped in making the publication of this volume possible.

Gilbert Y. Steiner
Director
Institute of Government and
Public Affairs

INTRODUCTION

Because Illinois voting statistics have been, up to this time, widely scattered, it has been difficult to study long-range voting trends in a systematic way. The lack of a central source for election statistics is not unique to Illinois, but is the case in all but a handful of states. Illinois Votes is intended to provide this central source on a county-by-county basis.

The data in this volume has been compiled for each presidential and gubernatorial election since 1900. All contests for United States senator are included since the popular election of these officials began in 1916. In addition, the contests for state treasurer in non-presidential years are included to permit a study of voting trends for those years when national issues have less influence on the outcome of state contests.

Preceding each election year is a summary sheet that includes the names and parties of the candidates for each office, the number of counties carried by each party, and a breakdown between Downstate and Cook County returns. The summary sheets, rather than the tables that follow, are the only source for the names of candidates and the names of "minor" parties; i.e., parties other than Republican or Democratic. On the tables the vote of all the minor parties are grouped under the heading "other vote."

Percentage comparisons have been computed by county for each contest, both as a percentage of Republican-Democratic votes cast and as a percentage of the total vote, which includes the minor parties. The Republican-Democratic plurality percentage shown is that plurality as a percentage of the total vote cast.

The "total vote cast" figure carried in the left-hand column of each table is the total number of votes cast for that contest and not the total vote cast in the election.

Cook County and Chicago present a special problem to the student of Illinois voting behavior. Cook County now has over 50 percent of the state's population. Chicago, which had 35 percent of the state's population in 1900, had about 33 percent by 1955; Cook County outside Chicago increased from 3 percent to 12 percent; Downstate (all counties other than Cook) declined from 62 percent to 49 percent. Because of the obvious impact of the Chicago vote on any statewide contest, a breakdown of the Cook County vote between the city and suburban areas for each contest is included.

One caution should be noted when using the Chicago or suburban Cook County data. The boundaries of the city have changed since 1900, as about 30 annexations have added over 30 square miles to the legal boundaries of the city. (The details of these annexations are described in the Local Community Fact Book for Chicago published by the Chicago Community Inventory, University of Chicago.) Data on the number of persons brought within the city limits by each annexation are not readily available, but it is probable that they have not markedly affected the total city population, especially in comparison to population increases from other factors.

The boundaries of Cook County and the other 101 counties have remained constant in the period covered by this volume, although there have been marked movements of population, with some counties greatly increasing and others significantly losing. Thus the population changes of any particular county should be considered in analyzing the reason or reasons for marked changes in the total vote cast over the years. Also it should be noted that the percentage figures are not weighted for the voting strength of a county:

consequently, a percentage figure for a party's vote in Cook County is much more significant in a statewide analysis than the same percentage figure for sparsely-populated Putnam County.

As indicated earlier, the "other vote" figure is the sum of the vote for the "minor" parties. Generally, minor parties have not been successful in Illinois politics, with the 1912 Progressive (Bull Moose) movement being the major exception. For this year, the Progressive party vote is given in a separate table. In other years, including 1924 when LaFollette ran, minor parties have been successful in only a handful of counties at most, and usually have run well behind the Republican and Democratic candidates.

The figures for "other" votes in the tables include votes only for the candidates whose names were on the ballot, not for "write-ins." The practices of county officials in reporting write-ins vary considerably, with some ignoring these votes and others very carefully reporting them.

The major source of data for the tables that follow is the reports of the Illinois Secretary of State. After most elections, the Secretary has published a separate pamphlet of voting returns. For a few years around 1920, these pamphlets were not published, and the source of these elections is the Illinois Blue Book, also published by the Secretary of State. The source for the Chicago returns in statewide elections is the records of the Chicago Board of Election Commissioners. Since 1954, these returns have been included in some detail in the Secretary of State's pamphlet. For the period 1900-1936, the Chicago returns were published in the Chicago Daily News Almanac and Yearbook.

For the person who wants information on offices or elections, not included in this volume, the following sources are suggested:

1. For early election returns, see Theodore C. Pease, Illinois Election Returns 1818-1848, Collections, the Illinois Historical Library, Springfield, 1923, 598 pp.

2. For statewide returns since 1870 (excepting 1918, 1920, 1922, 1924 and 1928) see a pamphlet (Official Vote of the State of Illinois) published by the Illinois Secretary of State, which includes returns for all statewide contests, all contests for congressional seats, and all contests for seats in the General Assembly, and contains the total vote cast in each county. Data are included for contests in both the primary and general elections. In addition, returns for judicial contests and special propositions are included. The format of the pamphlet has changed and the data included have varied considerably over the years, so that not all of the above-mentioned election returns are included in each issue of the pamphlet. As stated earlier, the pamphlets since 1954 have included detailed returns for Chicago and suburban Cook County. Statewide data for the years 1918, 1920, 1922, 1924, and 1928 are included in the Illinois Blue Book.

3. For Chicago and suburban returns prior to 1936, the Chicago Daily News Almanac and Yearbook is the best published source. Some of the data for major offices are presented on a precinct-by-precinct basis. The Almanac also includes statewide returns for the same period. It should be noted that the presentation of the data is not always uniform, and data on all elections are not always included. The unpublished records of the Chicago Board of Election Commissioners contain election data for Chicago and certain communities under the Board's jurisdiction not included in the Almanac.

4. A recently published source containing election data for Illinois and the other states is America Votes, compiled and edited by Richard A. Scammon, Governmental

Affairs Institute, and published by the Mac Millan Company, New York. Two volumes of this series have already been published, and a new volume is to come out every two years. The Illinois data include the vote for president, United States senator, and governor by county for each election since 1948. A breakdown for the returns by ward within the City of Chicago and the total vote for congressional contests are also included. The same percentage analysis of the data that is used in this volume (Illinois Votes) is also used in America Votes.

5. Another source containing election data for Illinois and other states is Vote Cast in Presidential and Congressional Elections, 1928-1944, published by the U. S. Bureau of the Census in 1944. This volume includes state summaries of the vote in presidential and congressional elections, and percentage analysis of party voting. For the 1940 and 1944 presidential elections and the 1942 and 1944 senatorial elections, the data are shown by counties; for the 1942 and 1944 elections for Representatives in Congress, by congressional districts.

* * * * *

In compiling this volume, every possible precaution has been taken to prevent errors. For any that have not been caught, the editor accepts responsibility. In a few instances errors have been noted in the published material used as basic sources. Where it has been impossible to verify the correctness of the original data, the county returns have been included rather than the total shown in the original source.

ACKNOWLEDGMENT

Among the many persons who helped in the compilation of this volume are three research assistants, Messrs. Victor Sapio, William McClure, and Edmund Lyons. All three have rendered valuable assistance at various stages, but Mr. Sapio worked last and longest. The data were processed on electronic equipment by the University's Statistical Service Unit, and the cooperation of Mr. Francis Flerchinger of the unit is especially appreciated.

Also several public officials were most helpful, particularly Mr. Don Butler of the office of Secretary of State in Springfield, and Mr. Sidney Holzman, Chairman of the Chicago Board of Election Commissioners. Mr. Holzman was particularly helpful in supplying last minute data that made it possible to meet the publication deadline.

Much credit for the completion of the volume must go to the secretarial staff of the Institute, particularly Mrs. Laura Duncan and Miss Doris Falk, who were constantly alert to the possibility of error. In addition, Mr. Joseph Tucker, research assistant, aided in the final stages of the project.

Lastly, the editor is grateful to the University Research Board for a grant that made it possible to bring the project to completion.
